True to the Best of Belief

On Sunday, 26th September 2010, the Claimant traced a scrap dealer previously reported for stealing a veterinary practice car back in 1996. (4th Action, para 11)

The following information is just part of what the scrap dealer told the Claimant relating to a number of incidents identified in the 4th Action:

The Barry police visited his Barry scrap yard where the car was identified as the one stolen. Police were informed the Vale Council, a Mr David Button, had authorised its collection from behind the Claimant's veterinary hospital as it was considered abandoned. The police then told him "we hate Kirk's guts". "I want you to take it immediately to Penarth police station, on your lorry, where I will later inform Kirk it has been traced". "I will have the greatest of pleasure in booking Kirk when he comes to collect it and drives it away without tax, MOT or insurance".

One of the police then jumped up into the scrap dealer's cab and was driven all the way out to Penarth leaving the other police officer to drive the police car away on other business. The police officer never informed the Claimant nor, on 3rd May 1996, did the Defendant explain the circumstances for it being in Penarth
